Research topics

- **Stimuli-responsive (co)polymers and amphiphilic block copolymers** synthesized by ionic and controlled radical polymerization;
- **Self-assembly** of amphiphilic block copolymers and **self-organization** of natural and synthetic (co)polymers (including polyelectrolytes) in aqueous media;
- **Chemical modification of polymers** by post-polymerization reactions on pre-existing functional groups and **surface modification of self-assembled nanostructures**;
- **Functionalization of polymer flocculants and sorbents** for improving the removal efficiency of pollutants (metal ions, dyes, pesticides, colloidal particles and droplets) from wastewaters;
- **Polymer-based nanoreactors and nanocarriers** with stimuli-triggered activity for biomedical, food and environmental applications.

Scientific research

Author and co-author of 17 scientific papers (15 articles in ISI-ranked journals), 5 book chapters, 3 articles as proceedings in scientific volumes, 4 lectures (2 invited, 1 plenary and 1 keynote), over 35 participations at national and international scientific meetings with oral communications and posters, 1 award for a poster presentation (Torun, Poland, 2010), and 6 participations as team member in national/international research grants. **Author output:** h-index = 8; citations = 191 Scopus, 178 Web of Knowledge; cumulative impact factor 2016 = 63.75 (Web of Knowledge).
